Home Health Care

Home health care is a wide range of health care services that can be given in your home for an illness or injury. Home health care is usually less expensive, more convenient, and just as effective as care you get in a hospital or skilled nursing facility (SNF).

Diagnostic Services

Diagnostic services are a broad range of tests that are essential to the basic management of patient care, allowing physicians to detect disease earlier, make diagnoses, prescribe therapies, and monitor patient results. These services include laboratory testing as well as X-rays, using radiographic techniques.

 EkoDoc chat

Features

- Patients will be asked to fill a short registration form at the time of booking an appointment. This patient information will be stored in the system
